From early answer sheets filled in with number 2 pencils, to tests administered by mainframe computers, to assessments wholly conducted by computers, it is clear that technology is changing the field of educational and psychological measurement. The numerous and rapid advances have immediate impact on test creators, assessment professionals, and those who implement and analyze assessments. This comprehensive new volume brings together leading experts on the issues posed by technological applications in testing, with chapters on game-based assessment, testing with simulations, video assessment, computerized test development, large-scale test delivery, mode choice, validity, and error issues. Including an overview of existing literature and ground-breaking research, each chapter considers the technological, practical, and ethical considerations of this rapidly-changing area. Ideal for researchers and professionals in testing and assessment, Technology and Testing provides an overview and in-depth look at one of the most pressing topics in educational testing today.

"This book is fantastic and has been purchased by many of our students who have subsequently passed the test." - Sarah Martin-Denham, Faculty of Education and Society, University of Sunderland All applicants to Initial Teacher Training in England need to PASS the QTS Literacy Skills Test before starting their course. This professional skills test is designed to ensure trainee teachers have a sound grasp of literacy skills and specifically that of comprehension and spelling and how to apply these in practice. Millions of Americans experience some degree of hearing loss. The Social Security Administration (SSA) operates programs that provide cash disability benefits to people with permanent impairments like hearing loss, if they can show that their impairments meet stringent SSA criteria and exceed the SSA disability threshold. The Social Security Council on Disability convened an expert committee at the request of the SSA to study the issues related to disability determination for people with hearing loss. This volume is the product of that study. Hearing Loss: Determining Eligibility for Social Security Benefits reviews current knowledge about hearing loss and its measurement and treatment, and provides an evaluation of the strengths and weaknesses of the current processes and criteria. It recommends how to strengthen the disability determination process and ensures its reliability and fairness. The book addresses criteria for selection of pure tone and speech tests, guidelines for test administration, testing of hearing in noise, special issues related to testing children, and the difficulty of predicting work capacity from clinical hearing test results. It should be useful to audiologists, otolaryngologists, disability advocates, and others who are concerned with people who have hearing loss.

This publication, prepared under the aegis of the WIPD Creative Heritage Project by two external consultants, Ms. Molly Torsen and Dr. Jane Anderson, offers legal information and compiles practical experiences on the management of intellectual property for cultural institutions whose collections contain traditional cultural expressions. It seeks to respond directly to the needs of cultural institutions, indigenous and traditional communities dealing with the preservation, safeguarding and protection of cultural heritage.

Human lactation has evolved to produce a milk composition that is uniquely-designed for the human infant. Not only does human milk optimize infant growth and development, it also provides protection from infection and disease. More recently, the importance of human milk and breastfeeding has been recognized as being integral to infant health and well-being. Ancestral influences on milk composition are highly variable both between and within mothers. Indeed, the distinct maternal human milk signature, including its own microbiome, is influenced by environmental factors, such as diet, health, body composition and geographic residence. An understanding of these changes will lead to unravelling the adaptation of milk to the environment and its impact on the infant. In terms of the promotion of breastfeeding, health economics and epidemiology is instrumental in shaping public health policy and explicitly addressing the challenges and weaknesses of the current processes and criteria. It recommends how to strengthen the disability determination process and ensures its reliability and fairness. The book addresses criteria for selection of pure tone and speech tests, guidelines for test administration, testing of hearing in noise, special issues related to testing children, and the difficulty of predicting work capacity from clinical hearing test results. It should be useful to audiologists, otolaryngologists, disability advocates, and others who are concerned with people who have hearing loss.

In this book the author, himself a philosopher, and long known for his studies of Arabic thought, presents a factual account of Avicenna's philosophy. Setting the thinker in the context of his often turbulent times and tracing the roots and influences of Avicenna's ideas, this book offers a factual philosophical portrait. It details Avicenna's account of being as a synthesis between the seemingly irreconcilable extremes of Aristotelian eternalism and the creationism of monotheistic scripture. It examines Avicenna's distinctive theory of knowledge, his ideas about immortality and individuality, including the famous 'floating man argument', his contributions to logic, and his prolegomena on rhetoric and poetics.

Leading international artists and art educators consider the challenges of art education in today's dramatically changed world. The latest explosive change in art education came nearly a century ago, when the German Bauhaus was founded. Today, dramatic changes in the art world—its increasing professionalization, the pervasive power of the art market, and fundamental shifts in art making itself in our post-Duchampian era—combined with a revolution in information technology, raise fundamental questions about the education of today's artists. Art School (Propositions for the 21st Century) brings together more than thirty leading international artists and art educators to reconsider the practices of art education in academic, practical, ethical, and philosophical terms. The essays in the book range over continents, histories, traditions, experiences, and fantasies of education. Accompanying the essays are conversations with such prominent artist/educators as J ohn Baldessari, Michael Craig-Martin, Hans Haacke, and Marina Abramovic, as well as questionnaire responses from a dozen important artists and educators, such as Marina Abramovic, Gedi Sibony, and Ed Ruscha. Cuneiform records made some three thousand years ago are the basis for this essay on the ideas of death and the afterlife current among the ancient peoples of the Tigro-Euphrates Valley. With the same careful scholarship shown in his previous volume, The Babylonian Genesis, Heidel interprets the famous Gilgamesh Epic and other related Babylonian and Assyrian documents. He compares them with corresponding portions of the Old Testament in order to determine the inherent historical relationship of Hebrew and Mesopotamian ideas.

This book provides a detailed description of research and application outcomes from the Assessment and Teaching of 21st Century Skills project, which explored a framework for understanding the nature of these skills. The major element of this new volume is the presentation of research information from the global assessment of two 21st century skills that are amenable to teaching and learning: collaborative problem solving, and learning in digital networks. The outcomes presented include evidence to support the validity of assessment of 21st century skills
and descriptions of consequent pedagogical approaches which can be used both to teach the skills and to use them to enhance key learning goals in secondary education systems. The sections of the volume are connected through a focus on the degree to which innovative assessment tasks measure the constructs of interest. This focus is informed by conceptual and methodological issues associated with affordances of 21st century computer-based assessment. How understanding of the nature of the skills, as derived from these assessments, can guide approaches to the integration of 21st century skills in the classroom, is informed by initiatives adopted by participating countries. The guiding questions in this volume are: “Do the assessment tasks measure the constructs?” and “What are the implications for assessment and teaching in the classroom?” It is the third volume of papers from this project published by Springer.

The contemporary workplace is ever changing. In many countries the effects of economic globalization has seen the rise of trade union power and income inequality. In addition, high-performance work systems, business ethics and environmental sustainability are now creating tremendous challenges in many organizations. These developments play out amongst differing national and international contexts. This fluid and diverse environment makes it even more important to understand the myriad of different theories underpinning human resource management and to explore its impact on organizations, managers and workers. This engaging textbook provides an essential introduction to both the how and why of human resource management; it looks at the way organizations manage human capability, but also exposes the tensions inherent in the employment relationship, encouraging the reader to reflect critically on the realities of contemporary HRM. Building on the success of the previous five editions, this new edition includes: Two new chapters on Ethics in HRM and Green HRM New ‘HRM as I see it’ video interviews with real life HR managers sharing their experiences on managing people in organizations, accessible through a new interactive ebook New ‘HRM and Globalization’ features discussing the particular challenges faced by international organizations New ‘HRM in Practice’ features explaining practical implementation of HR theories Coverage of contemporary themes such as line managers’ roles in HRM, bullying, diversity and inequality Over 100 new references, bringing the discussion right up to date.
